## ANNOUNCEMENT

### ***AIRS - PLANNED OUTAGE***

#### AIRS RADIO FREQUENCY DRIVE TEST – DEC 5-16, 2011

**Background:** The PSIC Office recently requested and was awarded technical assistance from the US Department of Homeland Security to conduct a Drive Test along nearly 4000 miles of Arizona highways to evaluate the RF Frequency Coverage for the AIRS System.

**Planned Outage:** This drive test will be conducted December 5th - 16th, 2011 during daytime hours to get a solid, baseline measure of AIRS coverage in each of the three bands (VHF, UHF and 800 MHz).

During the test, the AIRS system in the vicinity of the test vehicle will be unavailable due to repetitive test tones. Further, there may be bleed over into neighboring AIRS regions. The following table shows the planned route and the impacted counties. In the event of weather or technical delays, updates will be made to the drive plan and posted on the PSIC website at <http://www.azpsic.gov/library/airs/>. The PSIC Office will also post a progress report to the website on Friday Dec 9<sup>th</sup>.

The Drive Team is on schedule and will end up in Sedona tonight, Dec 9<sup>th</sup>. They have decided to run the second half of the test from Sunday-Thursday rather than Monday-Friday. The updated schedule is highlighted in RED below.
